

CURSO ING2030

INVESTIGACIÓN, INNOVACIÓN Y EMPRENDIMIENTO

Objetivo de la sesión

Clase 2

- Repasar Business Model Canvas.
- Comprender el ajuste Problema – Solución.
- Comprender la elaboración de un Value Propositions Canvas.
- Introducirse en el ejercicio de entrevistar.

Nota por participación

Clase 2

- **¿Cuándo?:** Durante la clase 2
- **Tipo de participación:** Control de lectura
- **Enunciado:** De forma **INDIVIDUAL** tendrán máximo 10 minutos para responder una pregunta vinculada a los siguientes textos complementarios:
 - **1. Business Model Generation, A. Osterwalder, Y. Pigneur (p. 14-25)**
- **Objetivo:** Identificar mediante Business Model Canvas aquellos aspectos de su solución que generen valor a los potenciales clientes de su proyecto. Es relevante que tengan presente desde el principio todos los elementos que deberán considerar para el desarrollo de un buen proyecto.

¿QUE ES UN MODELO DE NEGOCIO?

? WHAT is a BUSINESS MODEL?

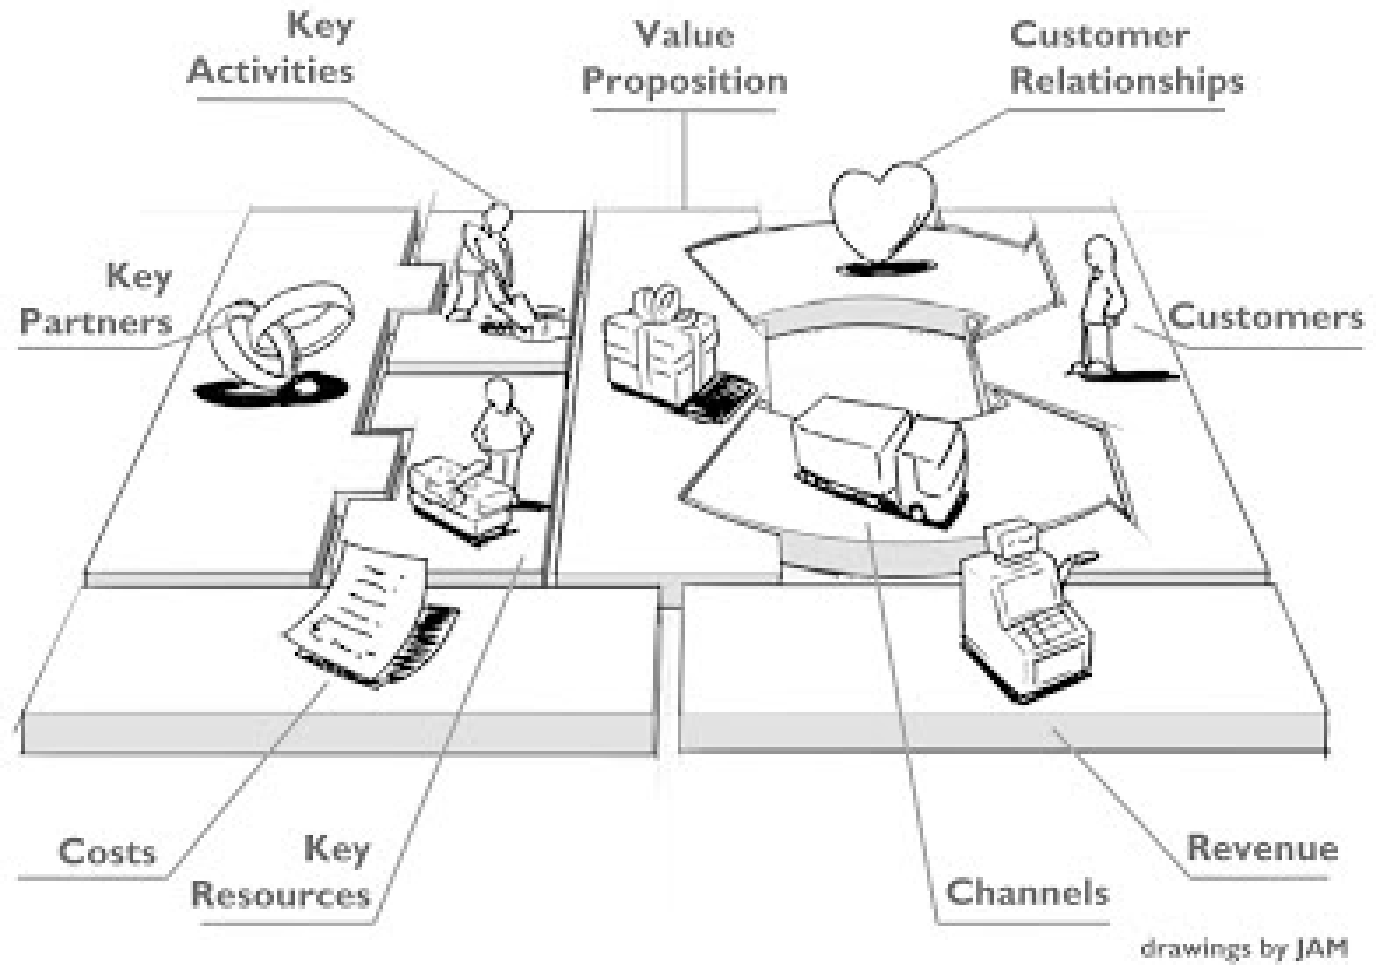

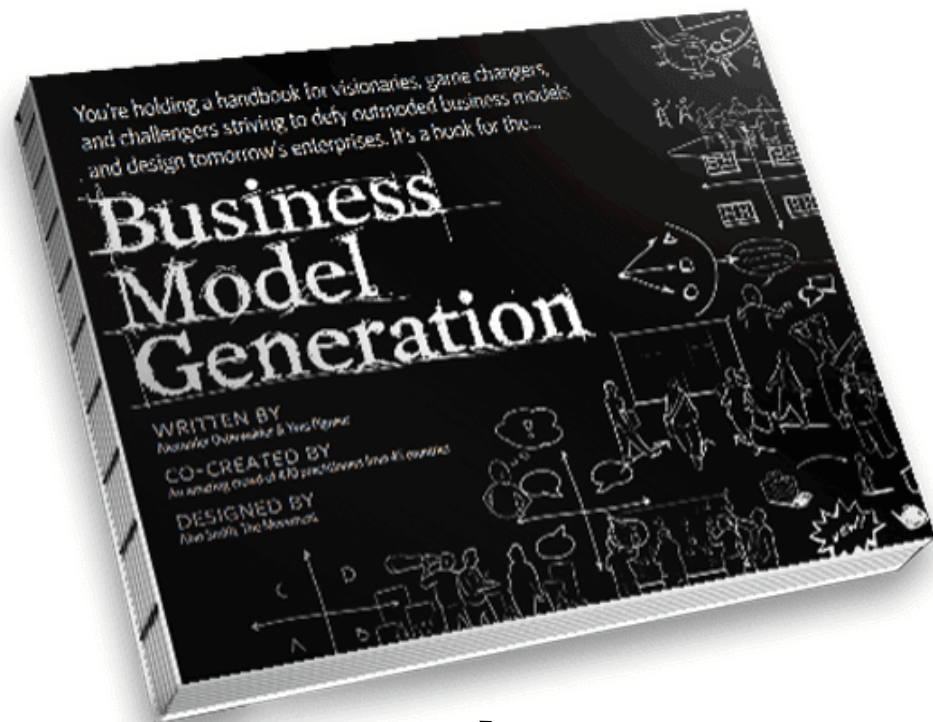

9 Components...

How a company
CREATES VALUE for
ITSELF while
delivering products
or services for
customers.

**“a business model is supposed to answer
who your customer is,
what value you can create/add for the customer
and how you can do that at reasonable costs”**

Peter Drucker

Alexander Osterwalder
& Yves Pigneur

SEGMENTOS DE CLIENTE

Customer Segments

The Customer Segments Building Block defines the different groups of people or organizations an enterprise aims to reach and serve

Who are your most important customers?

What are their *archetypes*?

What job do they want you to get done for them?

Customer Segments

The Customer Segments Building Block defines the different groups of people or organizations an enterprise aims to reach and serve

Customers comprise the heart of any business model. Without (profitable) customers, no company can survive for long. In order to better satisfy customers, a company may group them into distinct segments with common needs, common behaviors, or other attributes. A business model may define one or several large or small Customer Segments. An organization must make a conscious decision about which segments to serve and which segments to ignore. Once this decision is made, a business model can be carefully designed around a strong understanding of specific customer needs.

Who are your most important customers?

What are their archetypes?

What job do they want you to get done for them?

For whom are we creating value?
Who are our most important customers?

*There are different types of Customer Segments.
Here are some examples:*

Mass market

Business models focused on mass markets don't distinguish between different Customer Segments. The Value Propositions, Distribution Channels, and Customer Relationships all focus on one large group of customers with broadly similar needs and problems. This type of business model is often found in the consumer electronics sector.

Niche market

Business models targeting niche markets cater to specific, specialized Customer Segments. The Value Propositions, Distribution Channels, and Customer Relationships are all tailored to the specific requirements of a niche market. Such business models are often found in supplier-buyer relationships. For example, many car part manufacturers depend heavily on purchases from major automobile manufacturers.

Segmented

Some business models distinguish between market segments with slightly different needs and problems. The retail arm of a bank like Credit Suisse, for example, may distinguish between a large group of customers, each possessing assets of up to U.S. \$100,000, and a smaller group of affluent clients, each of whose net worth exceeds U.S. \$500,000. Both segments have similar but varying needs and problems. This has implications for the other building blocks of Credit Suisse's business model, such as the Value Proposition, Distribution Channels, Customer Relationships, and Revenue streams. Consider Micro Precision Systems, which specializes in providing outsourced micromechanical design and manufacturing solutions. It serves three different Customer Segments — the watch industry, the medical industry, and the industrial automation sector — and offers each slightly different Value Propositions.

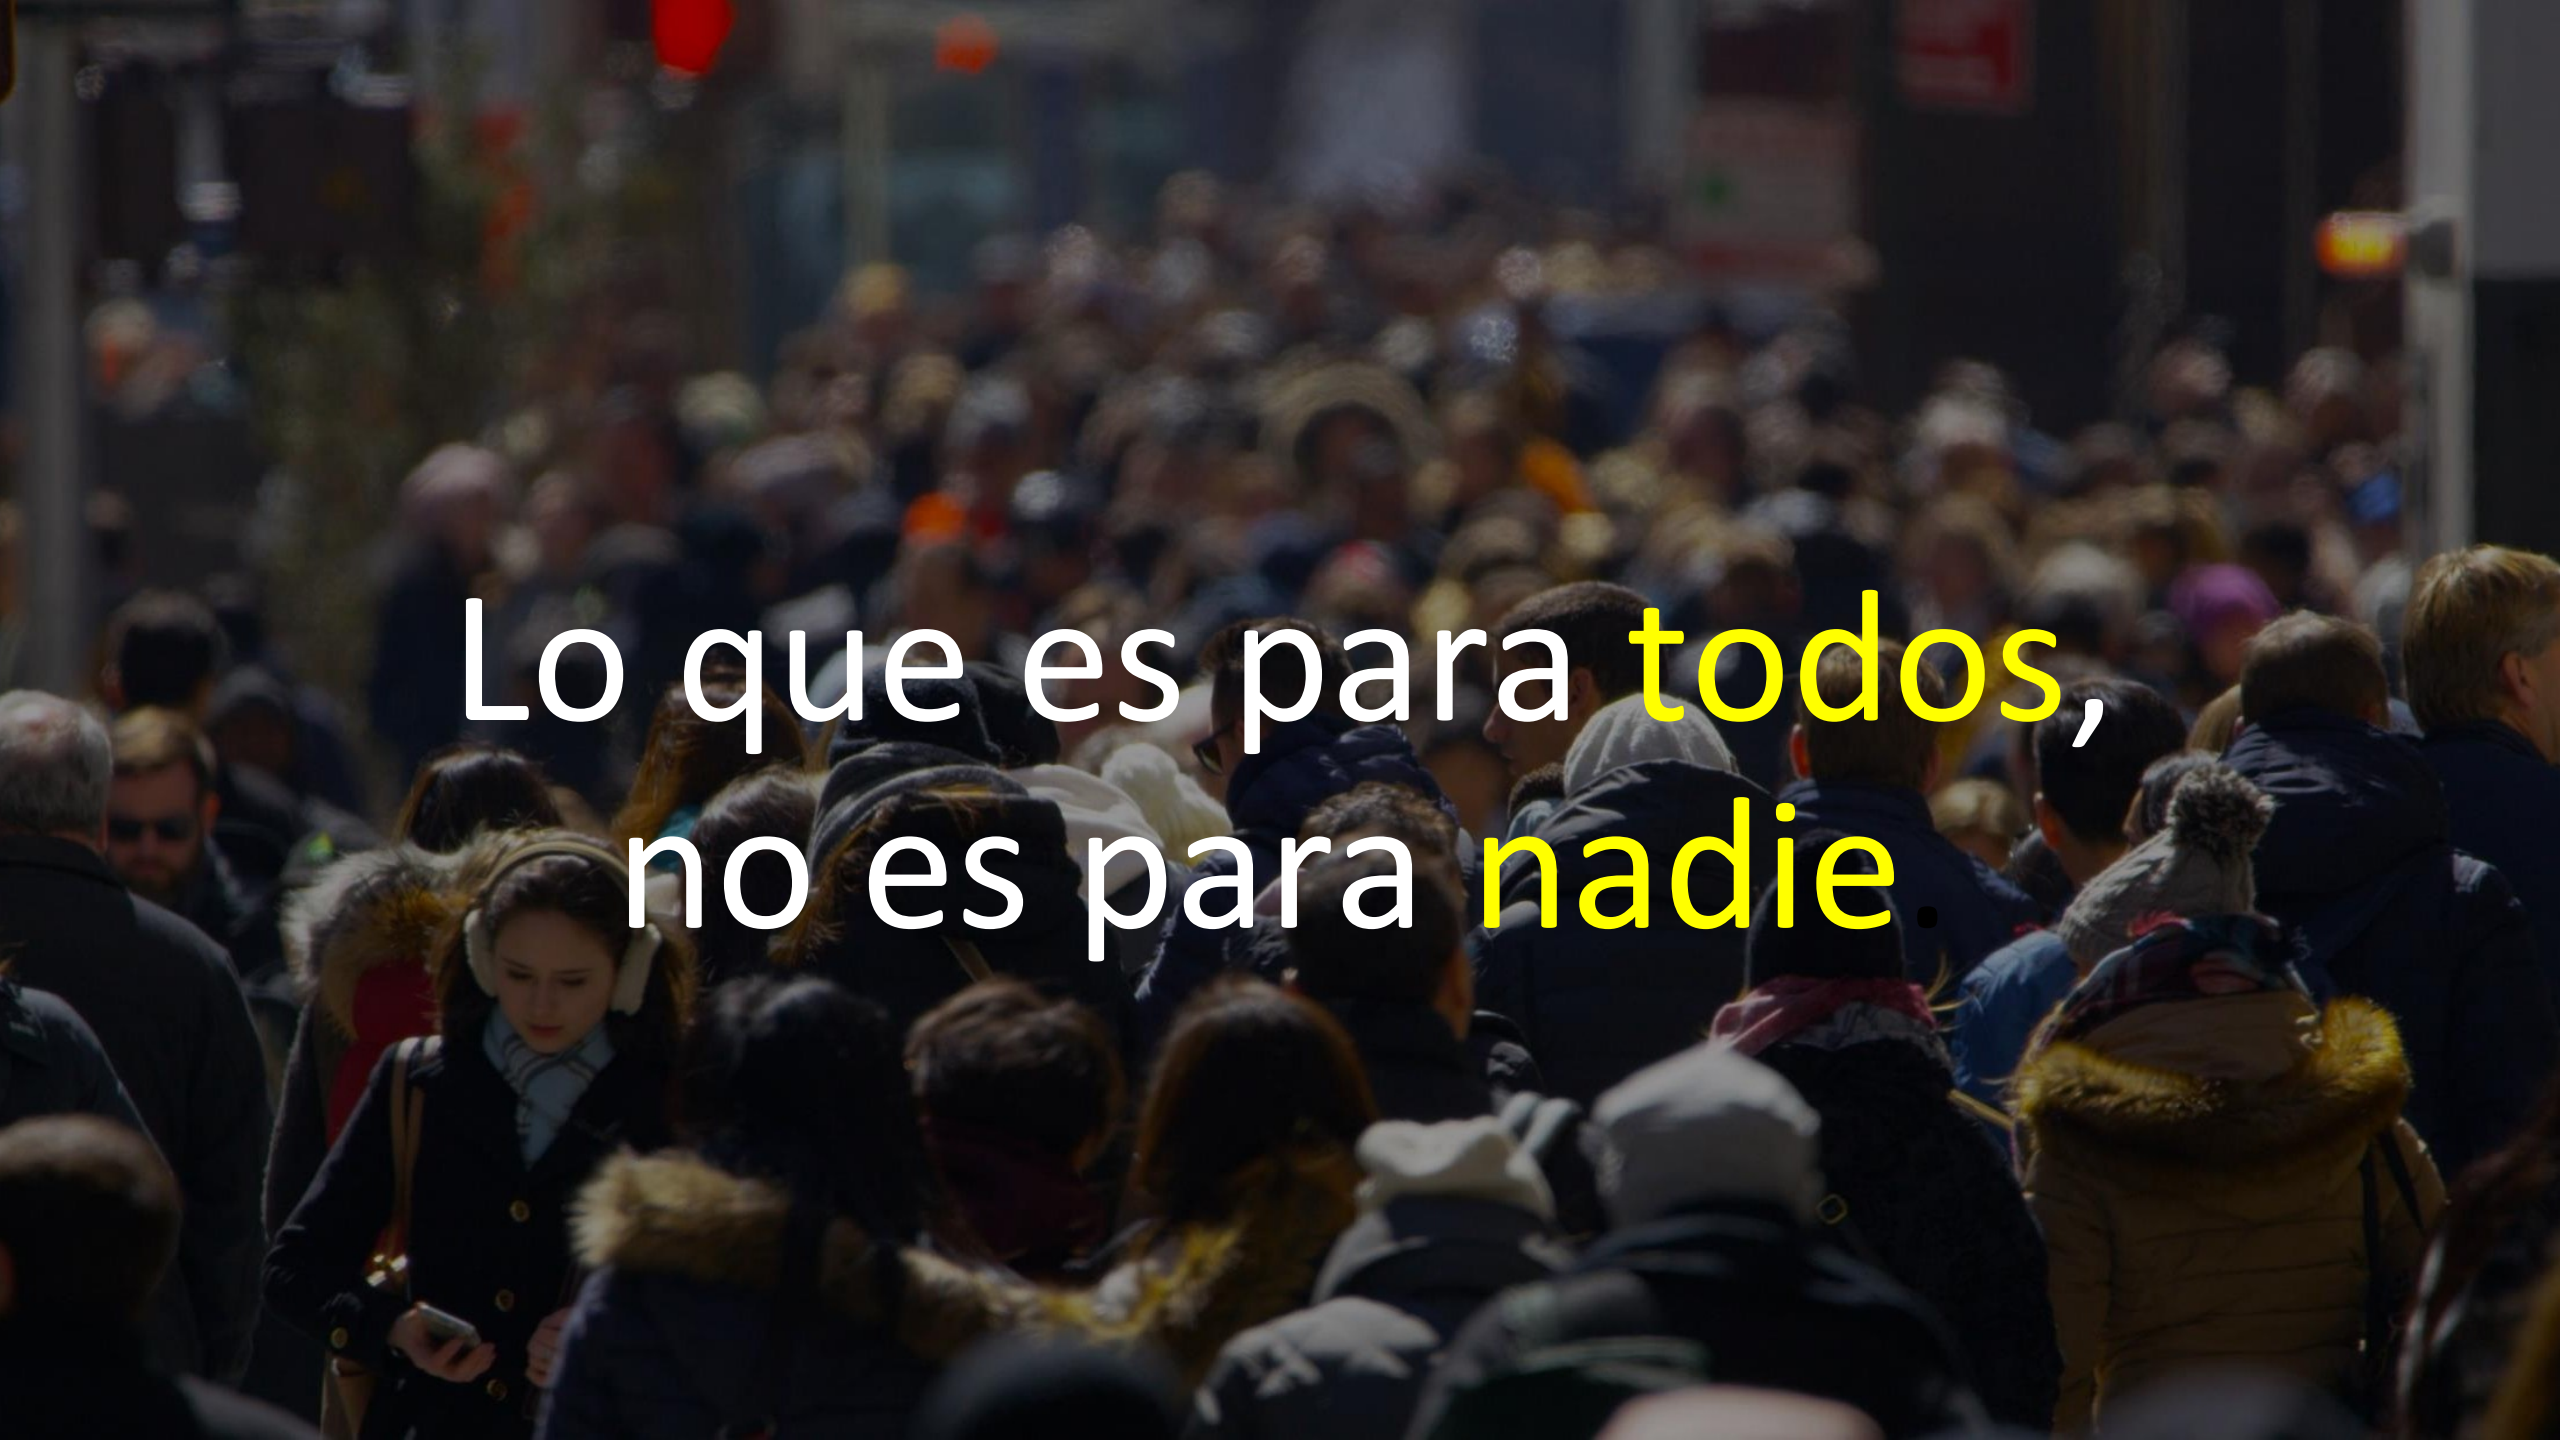

Diversified

An organization with a diversified customer business model serves two unrelated Customer Segments with very different needs and problems. For example, in 2006 Amazon.com decided to diversify its retail business by selling "cloud computing" services: online storage space and on-demand server usage. Thus it started catering to a totally different Customer Segment — Web companies — with a totally different Value Proposition. The strategic rationale behind this diversification can be found in Amazon.com's powerful IT infrastructure, which can be shared by its retail sales operations and the new cloud computing service unit.

Multi-sided platforms (or multi-sided markets)

Some organizations serve two or more interdependent Customer Segments. A credit card company, for example, needs a large base of credit card holders and a large base of merchants who accept those credit cards. Similarly, an enterprise offering a free newspaper needs a large reader base to attract advertisers. On the other hand, it also needs advertisers to finance production and distribution. Both segments are required to make the business model work (read more about multi-sided platforms on p. 76).

Un buen
modelo de negocio
parte de una
propuesta de valor
ajustada a un
segmento específico
de cliente.

Lo que es para **todos**,
no es para **nadie**.

Customer Segments

The Customer Segments Building Block defines the different groups of people or organizations an enterprise aims to reach and serve

Customers comprise the heart of any business model. Without (profitable) customers, no company can survive for long. In order to better satisfy customers, a company may group them into distinct segments with common needs, common behaviors, or other attributes. A business model may define one or several large or small Customer Segments. An organization must make a conscious decision about which segments to serve and which segments to ignore. Once this decision is made, a business model can be carefully designed around a strong understanding of specific customer needs.

Customer groups represent separate segments if:

- *Their needs require and justify a distinct offer*
- *They are reached through different Distribution Channels*
- *They require different types of relationships*
- *They have substantially different profitabilities*
- *They are willing to pay for different aspects of the offer*

Who are your most important customers?

What are their archetypes?

What job do they want you to get done for them?

Customer Segments

The Customer Segments Building Block defines the different groups of people or organizations an enterprise aims to reach and serve

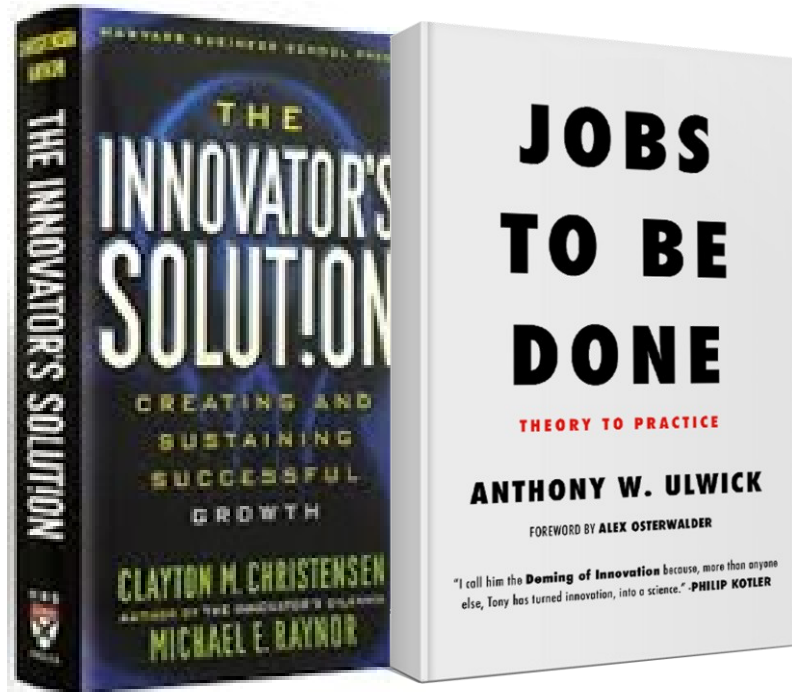

Customers comprise the heart of any business model. Without (profitable) customers, no company can survive for long. In order to better satisfy customers, a company may group them into distinct segments with common needs, common behaviors, or other attributes. A business model may define one or several large or small Customer Segments. An organization must make a conscious decision about which segments to serve and which segments to ignore. Once this decision is made, a business model can be carefully designed around a strong understanding of specific customer needs.

Who are your most important customers?

What are their *archetypes*?

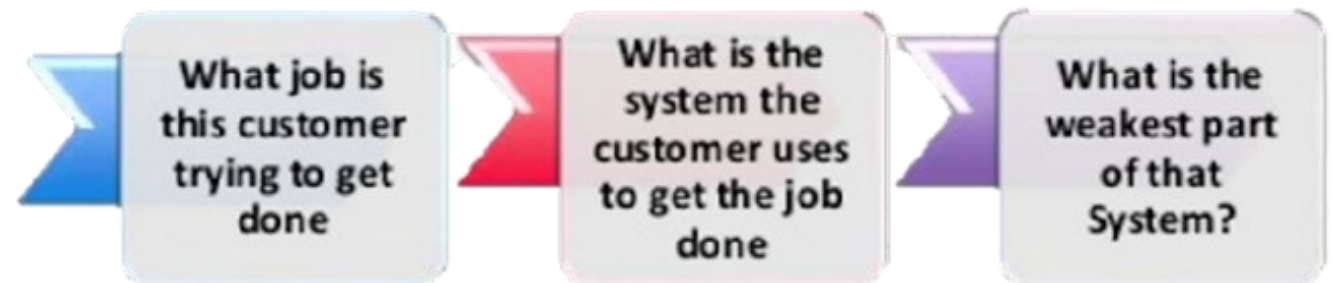

What job do they want you to get done for them?

JOBS TO BE DONE (Objetivos)

“Customers aren’t interested in buying products or services per se. They have problems they want to solve and goals they want to achieve.

These are **JOBS** they want to do”

¿POR QUÉ CONTRATARÍAS UN PRODUCTO O SERVICIO?

JOBS TO BE DONE

Un trabajo es definido como el progreso que un consumidor desea en una circunstancia particular.

Los clientes contratan productos/servicios para que hagan los trabajos que necesitan ...

... lo que significa que los clientes despiden otras soluciones o superar la inercia de no hacer nada.

Tenemos que conocer a esos clientes, conocer el progreso que buscan y definir métricas para medir ese progreso

LETS LOOK AT THE PROCESS IN A LOW TECH CASE...

You are the **product manager** of milkshakes in a convenience store. Management asks you to **increase the sells of milkshakes by 15%** and build the business case. **Where would you start?**

Where to start?

Add flavors

Focus on product attributes

Add toppings

Offer different sizes

This method generates **incremental improvements**. It is highly uncertain that the set goal will be reached.

This method was used in the real case and generated a slight increase in sales, but **did not lead to transformational changes!**

Why focusing on product attributes leads to incremental changes but not transformational ones?

**THEY DON'T
WANT A DRILL,
THEY WANT A
HOLE**

¿Cómo usa la gente tu producto/servicio? (contexto)

Con la observación de los clientes se encontró que la mayoría de ellos compraba sólo malteadas y lo hacía camino al trabajo.

El peak de demanda era entre las 7:30 y 8:30 am.

Entrevistaron a los clientes por la compra, no por el producto!

¿Qué hace una vez que compra la malteada?

¿Hacia dónde se dirige?

¿Por qué hizo esta selección?

Encontraron que compraban malteadas para hacer
el viaje al trabajo menos aburrido y para evitar
comerse un pan antes del almuerzo.

Encontraron que preferían las malteadas a otras
alternativas porque eran fáciles de tomar mientras
caminaban o manejaban.

En el contexto del “trabajo a realizar”, a los clientes no le importaba
mayormente el sabor, el tamaño o los aderezos del producto.

Comprender el contexto y el JTBD permitió rediseñar la propuesta de valor

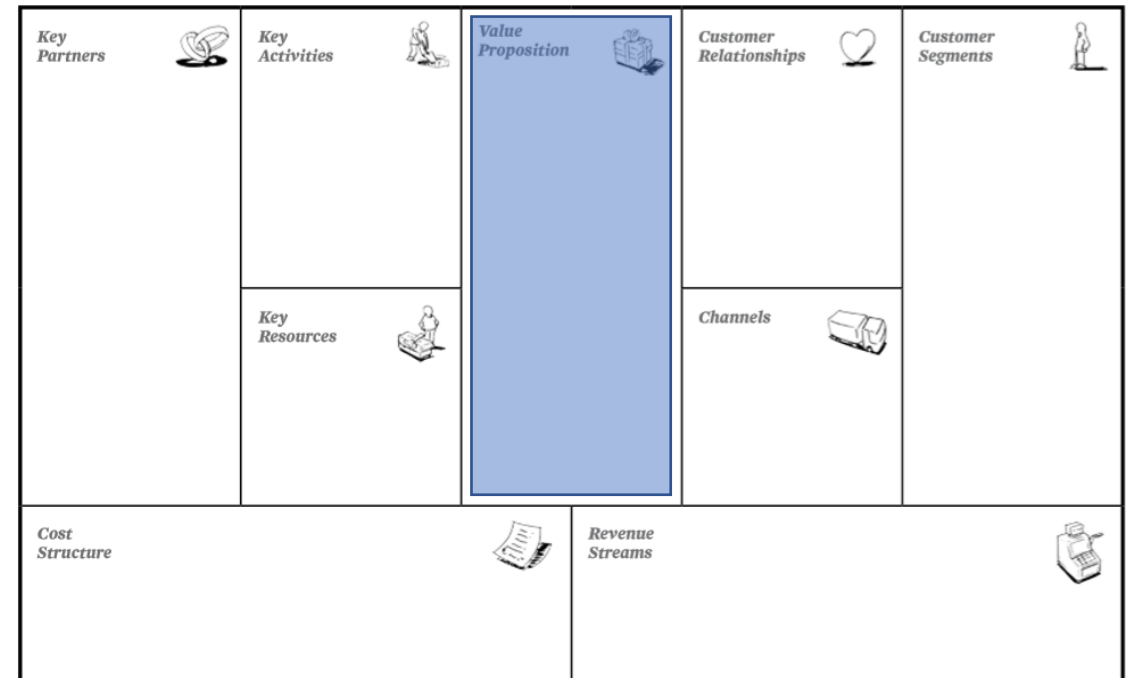

Ésta consistió en hacer más fácil comprar malteadas, enfocándose en clientes que, apurados por llegar al trabajo, querían hacer la compra más expedita.

Las ventas aumentaron significativamente.

El producto no cambió.

PROPUESTA DE VALOR

¿Qué **valor** le entregamos al cliente?
¿Qué **problema** de nuestros clientes
estamos ayudando a resolver?
¿Que necesidades estamos
satisfaciendo?
¿Qué abanico de productos o servicios
le estamos ofreciendo a cada segmento
de cliente?

SE HACE UN VPC PARA CADA SEGMENTO DE CLIENTE

Gains describe the outcomes customers want to achieve or the concrete benefits they are seeking.

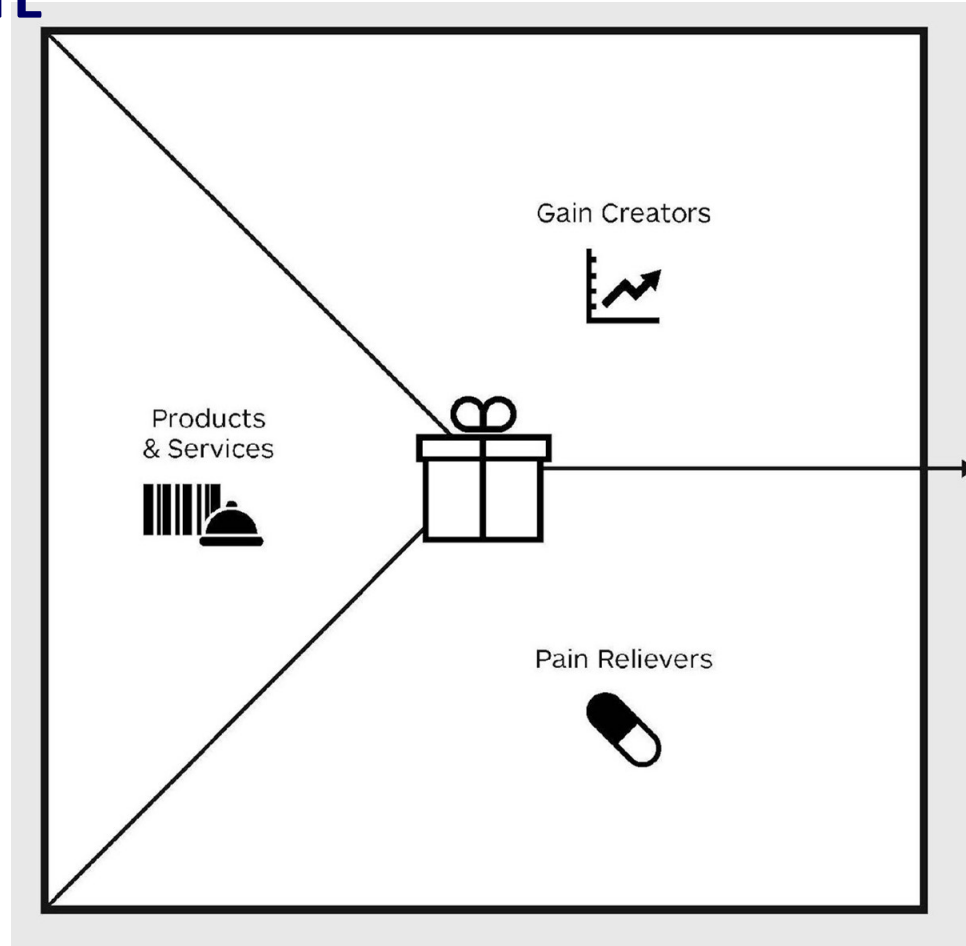

Pains describe bad outcomes, risks, and obstacles related to customer jobs.

Customer Jobs describe what customers are trying to get done in their work and in their lives, as expressed in their own words.

SE HACE UN VPC PARA CADA SEGMENTO DE CLIENTE

This is a list of all the **Products and Services** a value proposition is built around.

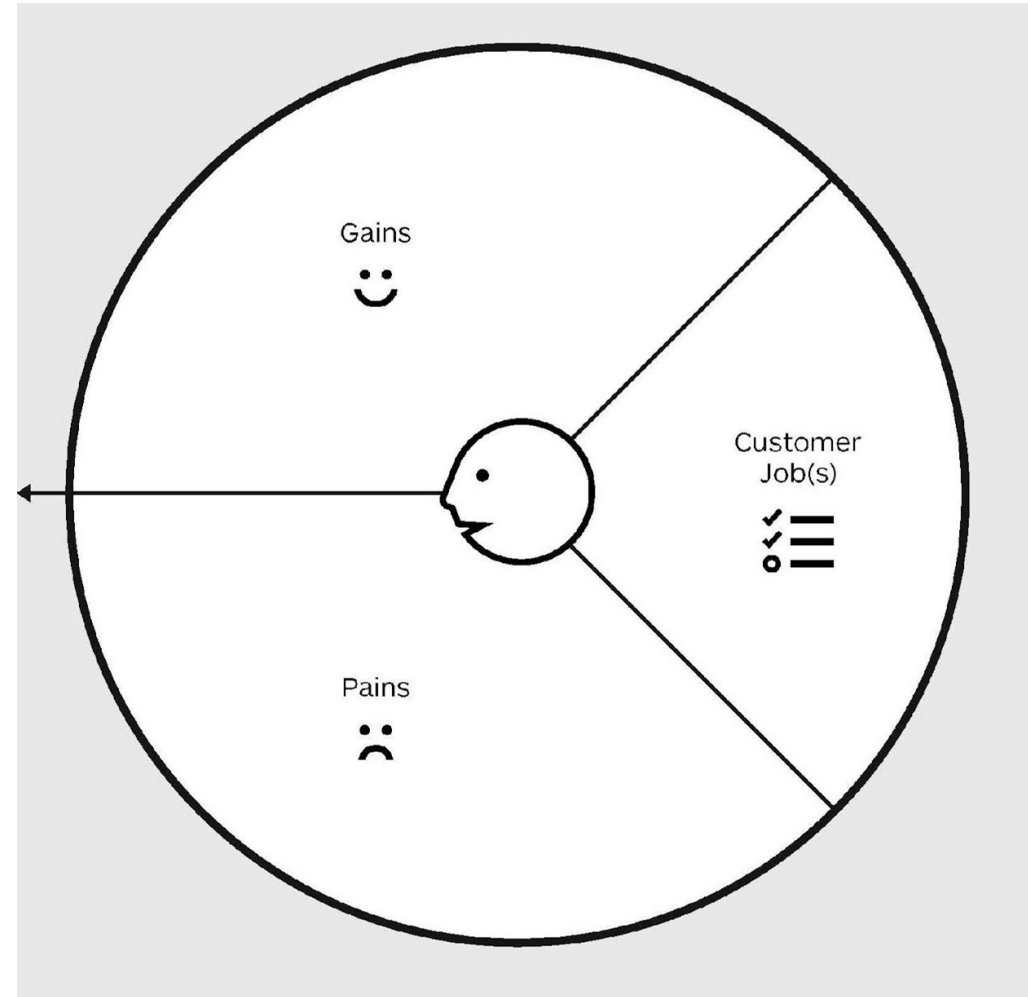

Gain Creators

describe how your products and services create customer gains.

Pain Relievers

describe how your products and services alleviate customer pains.

¿CÓMO SERÍA EL CUSTOMER PROFILE DE UBER?

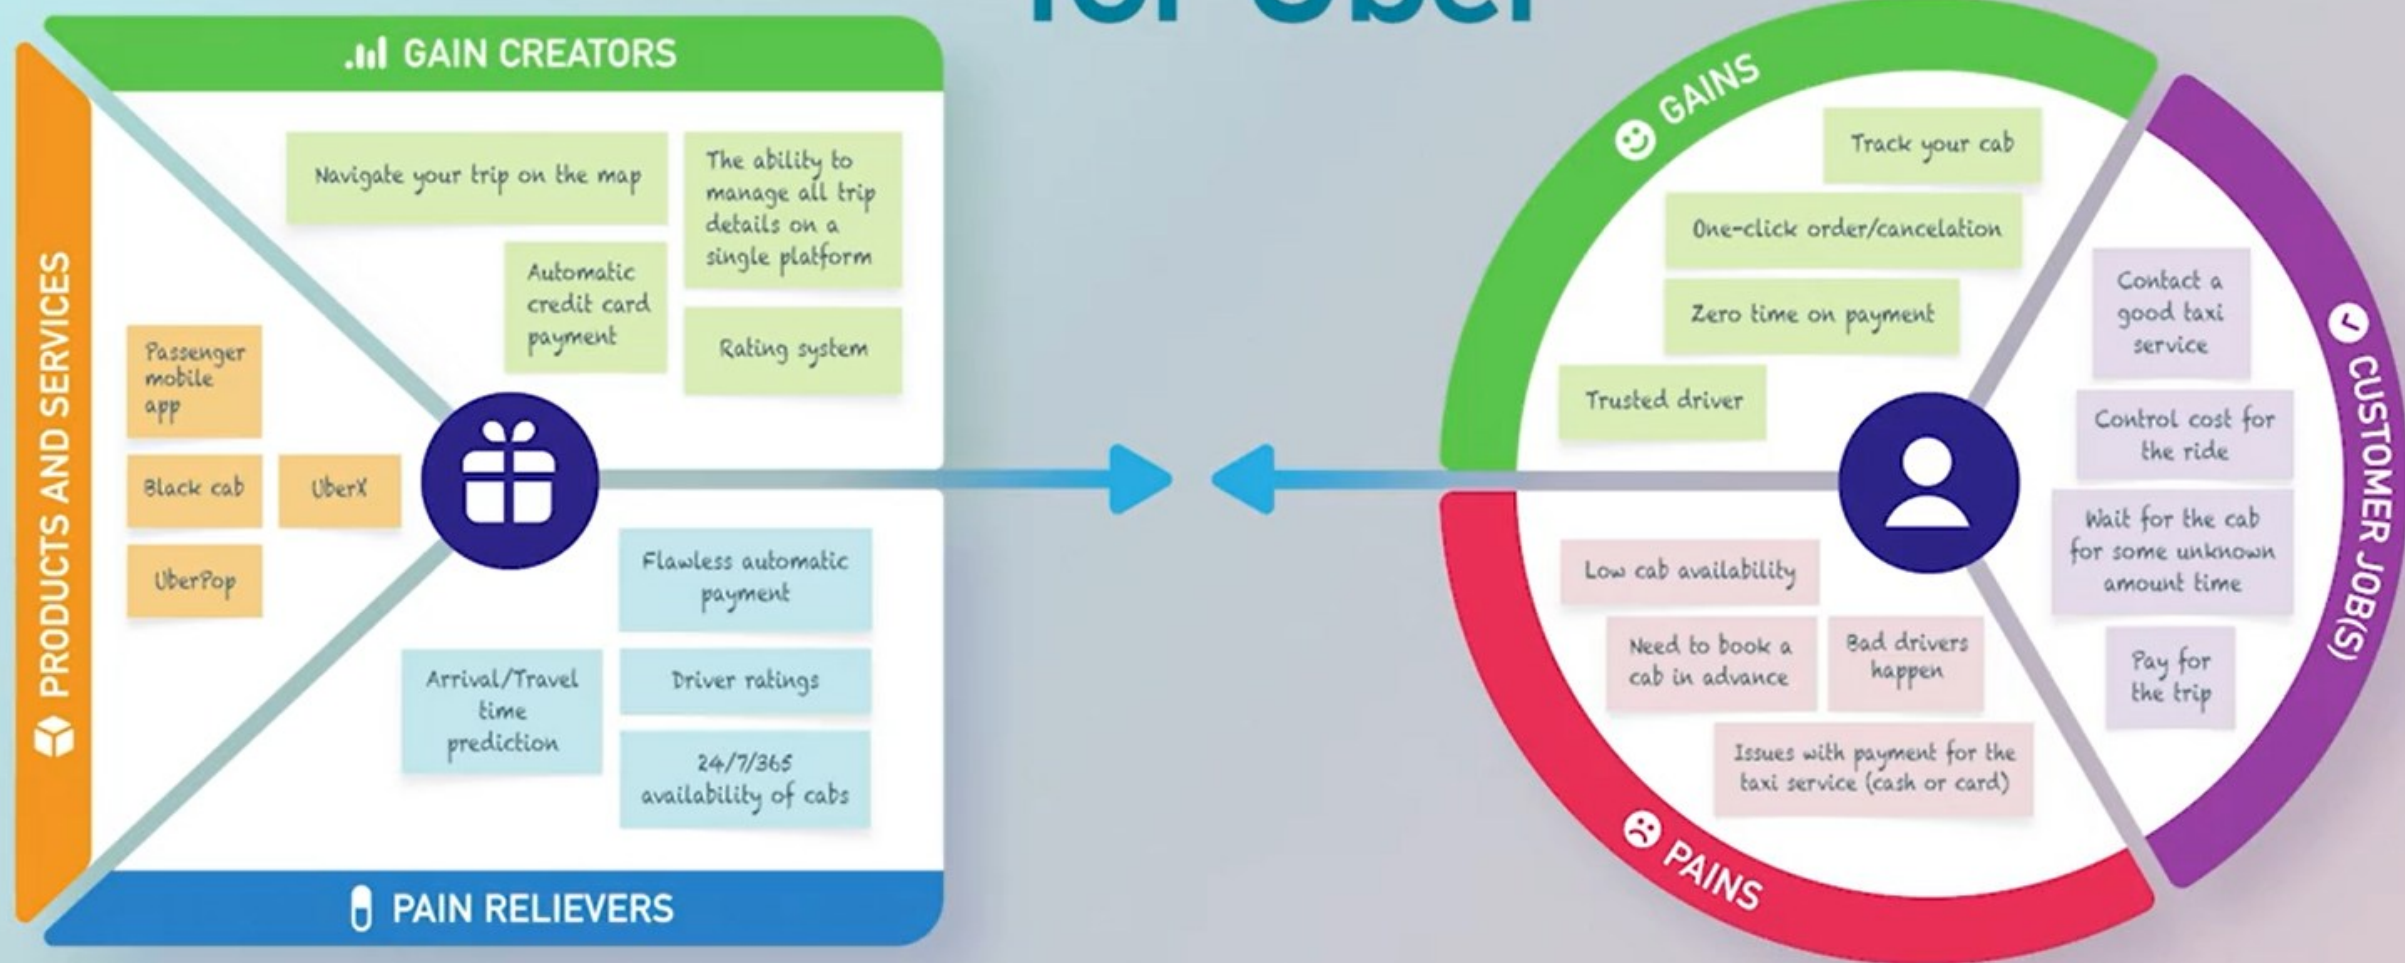

¿CÓMO SERÍA EL CUSTOMER PROFILE DE UBER?

PASAJEROS:

- Viaje personalizado (origen-destino exacto).
- On-demand en la app.
- Horas estimadas de recogida y llegada.
- Conveniencia de precio.
- Facilidad y comodidad (elimina los posibles roces en las interacciones): recogida rápida, seguimiento al chofer, selección tipo de vehículo, no es necesario explicar destino o ruta, sin necesidad de transacciones de efectivo.
- Sistema de evaluación y retroalimentación.
- Seguridad (datos del conductor, auto, compartir viajes y ubicación con familiares, etc).

Value Proposition Canvas for Uber

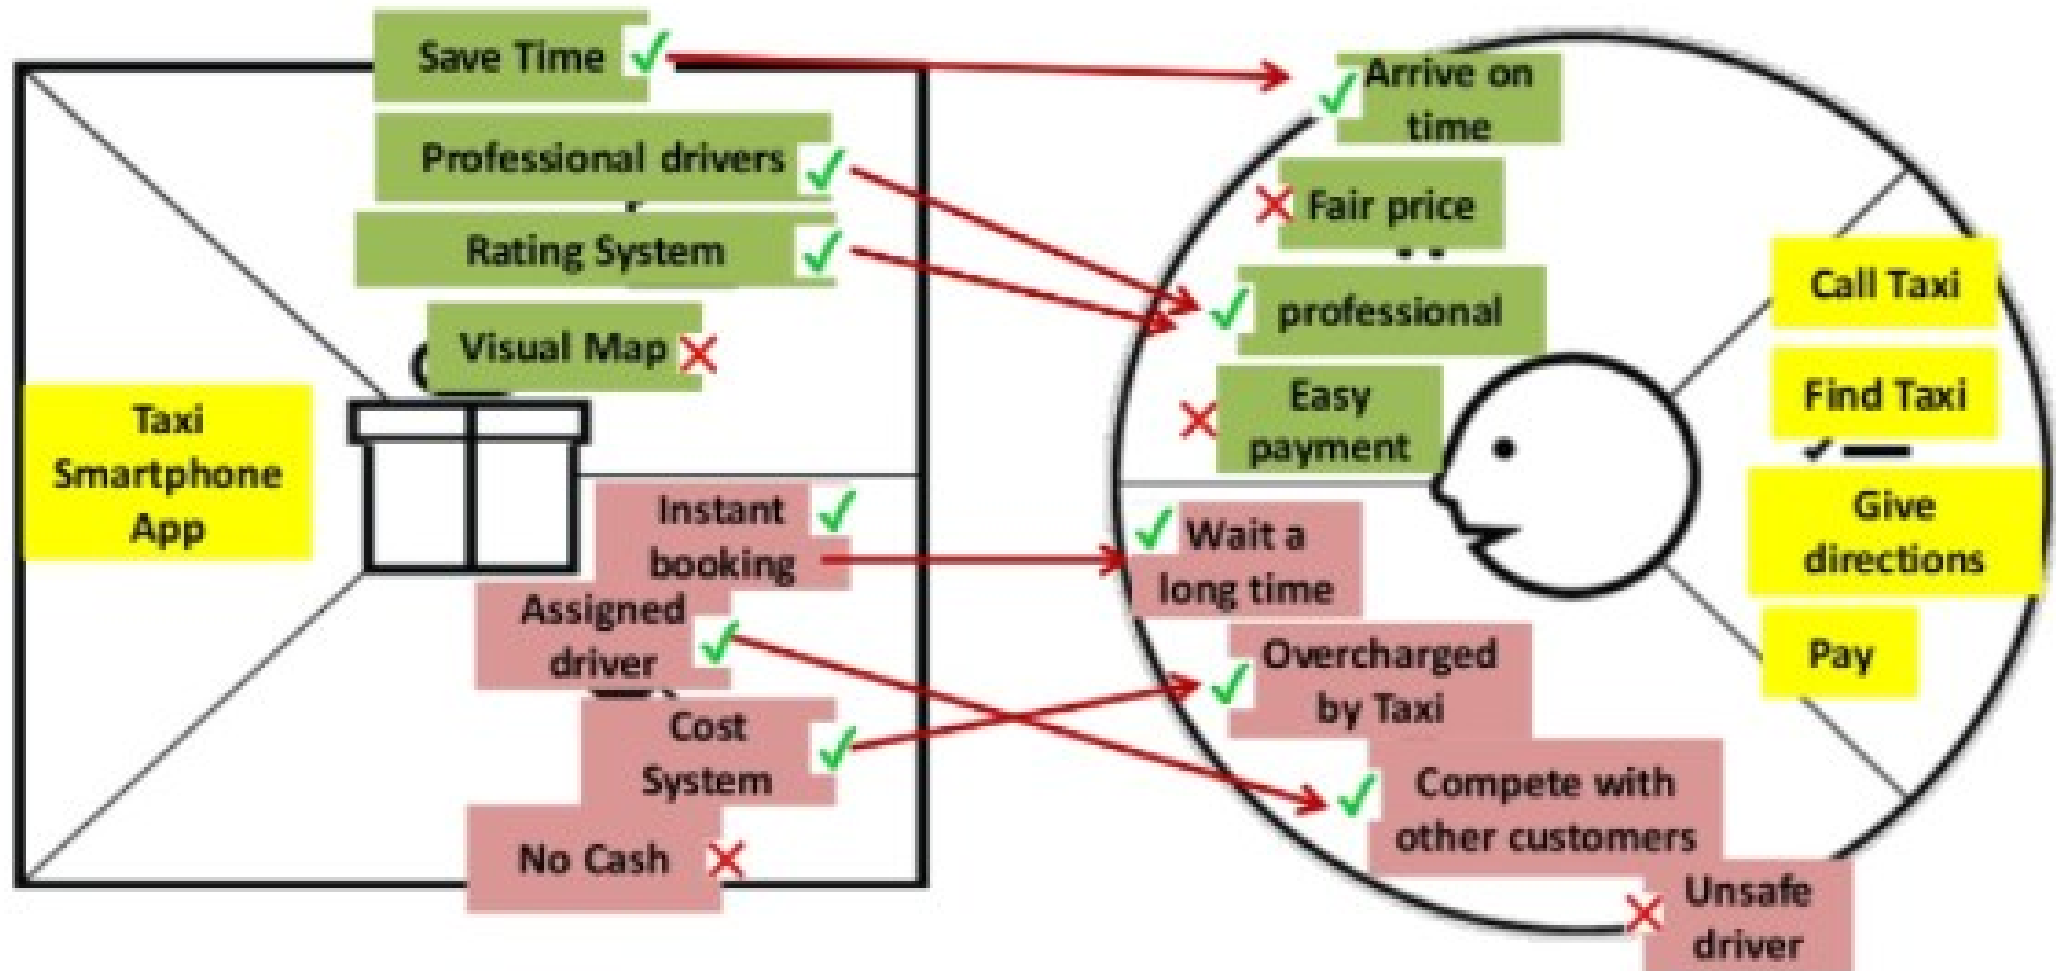

¿CÓMO SERÍA EL CUSTOMER PROFILE DE UBER?

CONDUCTORES:

- Generación de ingresos.
- Horas flexibles y predecibles (autodeterminadas).
- Seguimiento de sus ingresos en tiempo real.
- No hay jefe.
- Soporte 24/7 y apoyo con app que incluye datos de navegación, planificación, ingresos.
- Facilidad de unirse (no hay grandes requerimientos y es posible sin inversion).
- Programa de recompensas para conductors.
- Posibilidad de tener clientes (pasajeros) sin costo para el conductor.

CUSTOMER DEVELOPMENT

Interview Your Customers

2

Create an interview outline

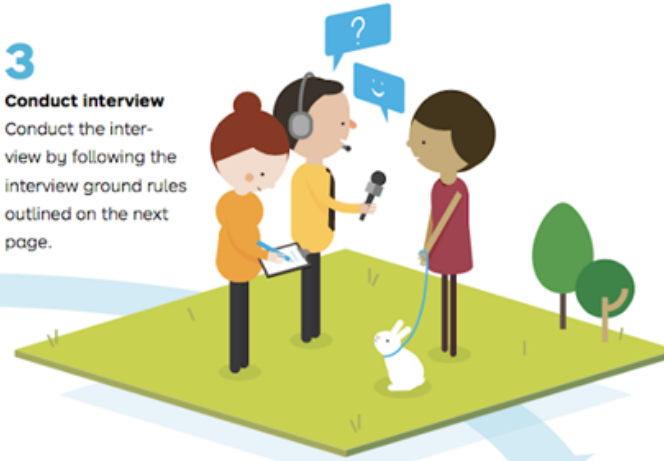

Ask yourself what you want to learn. Derive the interview questions from your customer profile. Ask about the most important jobs, pains, and gains.

3

Conduct interview

Conduct the interview by following the interview ground rules outlined on the next page.

Tip

Capture your biggest insights from all the interviews.

7

Synthesize

Make a separate synthesized customer profile for every customer segment that emerges from all your interviews. Write down your most important insights on sticky notes.

1

Create a Customer Profile

Sketch out the jobs, pains, and gains you believe characterize the customer you are targeting. Rank jobs, pains, and gains in order of importance.

5

Review interview

Assess if you need to review the interview questions based on what you learned.

10 x

4

Capture

Map out the jobs, pains, and gains you learned about in the interview on an empty customer profile.

6

Search for patterns

Can you discover similar jobs, pains, and gains? What stands out? What is similar or different among interviewees?

Make sure you also capture business model learnings. Write down your most important insights.

Why are they similar or different? Can you detect specific (recurring) contexts that influence jobs, pains, and gains?

Reglas básicas para entrevistar

Regla 1

Adopta una mente de principiante

Escucha con atención y evita las interpretaciones. Explora sobre todo los trabajos, frustraciones y alegrías inesperados.

Regla 2

Escucha más de lo que hablas

Tu objetivo es escuchar y aprender, no informar, impresionar o convencer al cliente de nada. Evita perder el tiempo hablando de tus creencias, ya que va en detrimento de descubrir más cosas sobre tu cliente.

Regla 3

Busca hechos, no opiniones

No preguntes: «¿Le gustaría...?»

Pregunta: «¿Cuándo fue la última vez que...?»

Regla 4

Pregunta «por qué» para llegar a las motivaciones reales

Pregunta: «¿Por qué necesita hacer...?»

Pregunta: « ¿Por qué _____ es importante para usted? »

Pregunta: «¿Por qué _____ es una frustración?»

Regla 5

El objetivo de las entrevistas para conocer a los clientes no es vender (aunque haya una venta involucrada), sino aprender

No preguntes: «¿Compraría nuestra solución?», sino: «¿Cuál es su criterio de decisión cuando realiza una compra...?»

Regla 6

No menciones soluciones (como la propuesta de valor de tu prototipo) demasiado pronto

No expliques «Nuestra solución hace...».

Pregunta: «¿Cuáles son los elementos más importantes con los que tiene problemas?»

Regla 7

Haz un seguimiento.

Pide permiso para guardar la información de contacto de tu entrevistado para volver a hacerle más preguntas o para probar los prototipos.

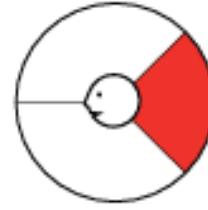

Regla 8

Al final deja siempre la puerta abierta.

Pregunta: «¿Con quién más debería hablar?»

Trabajos del cliente

Preguntas desencadenantes

Los trabajos describen las actividades que tus clientes intentan resolver en su vida laboral o personal. Podrían ser las tareas que intentan terminar, los problemas que intentan solucionar, o las necesidades que intentan satisfacer.

1. ¿Qué es aquello que tu cliente no podría vivir sin lograr? ¿Cuáles son los trampolines que podrían ayudar a tu cliente a conseguir ese trabajo clave?
2. ¿Cuáles son los contextos diferentes en los que pueden estar tus clientes? ¿Cómo cambian sus actividades y sus objetivos dependiendo de esos contextos diferentes?
3. ¿Qué es lo que necesita cumplir tu cliente que implica tener que interactuar con terceros
4. ¿Qué tareas intentan realizar tus clientes en su vida laboral o personal? ¿Qué problemas funcionales intentan solucionar?
5. ¿Hay problemas que crees que tienen los clientes de los que puede que no sean conscientes?
6. ¿Qué necesidades emocionales intentan satisfacer tus clientes? ¿Qué trabajos, si se terminaran, darían al usuario una sensación de autosatisfacción?
7. ¿Cómo quiere tu cliente que lo perciban los demás? ¿Qué puede hacer para fomentar que lo perciban así?
8. ¿Cómo se quiere sentir tu cliente? ¿Qué necesita para sentirse de esa manera?
9. Haz un seguimiento de la interacción que tiene tu cliente con un producto o servicio a través de su vida útil. ¿Qué trabajos de apoyo salen a la superficie a través de esto ciclo de vida? Durante este proceso, ¿el usuario cambia de papel?

PREGUNTAS A RESPONDER

- ¿Cuáles son los **top 3 objetivos** que los clientes están tratando de alcanzar?
- ¿Qué **hacen actualmente** para alcanzar sus objetivos?
- ¿Cuáles son los **top 3 obstáculos** que evitan su progreso?
- Si tu cliente tuviera una varita mágica y pudiera remover un obstáculo o generar un resultado, ¿cuál sería?
- ¿Qué hace falta para que reemplacen su solución actual o usen una mejor solución? ¿Qué hace cambiar su comportamiento?
